Residential Elevators

Since 1986 Elevator Concepts LTD has designed and manufactured high quality TIGER LIFT® elevators specifically for the residential and access market. While we have an extensive line of standard products, we specialize in custom designed elevators to suit unique structural or aesthetic requirements.

Raising the Standards

TIGER LIFT® elevators are engineered and manufactured to deliver a smooth, quiet ride while incorporating the highest standards and safety features not found in other residential elevators. Our compact designs require the space of an average home closet resulting in minimal disruption to the floor plan and traffic flow.

To ensure flexible design and installation options, we have developed elevators based on 5 drive platforms:

- overhead
- basement traction
- direct hydraulic
- roped hydraulic
- winding drum

No other manufacturer offers a product line this extensive.

Custom designed glass elevator with Bostwick style scissor gate

Cab Packages

Selecting the finished look of your elevator is one of the most important decisions you will make when choosing a TIGER LIFT® elevator. To assist in your decision, our designers have created standard cab packages featuring stylish, finished looks that easily fit any decorating need. We offer everything from durable and decorative laminate walls... to handcrafted recessed or raised hardwood panels.

Each cab package includes such standard amenities as: finished laminate ceiling, recessed incandescent light fixtures, brushed aluminum handrails, stainless car panel and hall buttons, unfinished floor and manual accordion gates.

Customizing

Our team of designers and engineers can custom manufacture an elevator to match virtually any décor, structural condition or budget restraints, making the TIGER LIFT® a perfect choice for both existing buildings and new home construction.

Cabs fabricated of multiple finishes, partial or full glass, mirror or stainless steel are popular customized cab interior options. Manual or power wrap-around gates or Bostwick scissor gates are alternative gate styles available at an additional charge.
